About the Iowa Great Lakes

West Lake Okoboji is Iowa's premier natural lake and - because of its exceptionally pure, spring fed water - is widely regarded as one of the finest water bodies in the Midwest. With a depth of 136 feet and covering almost 4,000 surface acres, the allure of West Lake makes it a water sport paradise. The blue water gem is part of the chain of lakes collectively known as the Iowa Great Lakes, carved into the landscape 14,000 years ago when the Wisconsin lobe of the Des Moines glacier last receded with unfathomable force.

The magnetism of Fillenwarth Beach begins with its location on the southern shore of West Lake Okoboji in Smith's Bay. Guests enjoy the resort docks for fishing, swimming, sunbathing and pure relaxation. Sunset views are famously spectacular.

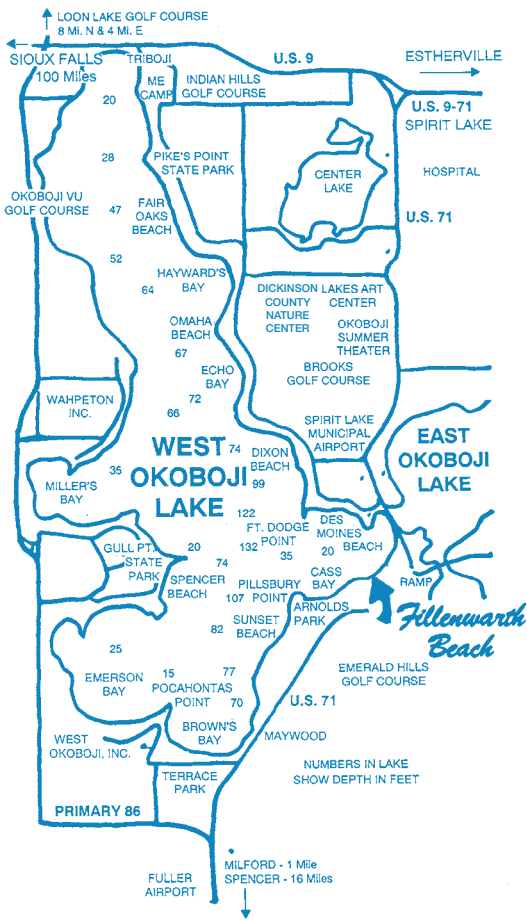

The Iowa Great Lakes region - known by most locals and visitors as simply Okoboji - is one of the most unique vacation experiences in the Midwest. Defined mostly by its lakes allure, the area abounds in natural wonders, an extensive recreational trail system, and cultural amenities. Come and find out for yourselves!

Our Location

Our resort office is located on the lakeshore two blocks north of the historic, renovated Arnolds Park Amusement Park. All of our units are lakeside or nearby with lake access. We have an entrance on U.S. Highway 71, one block north of Broadway Street in Arnolds Park. We are one block north of the Central Emporium mall, and within easy walking distance of ATMs, recreational trails, several excellent restaurants, shops and night spots.
